ACADEMIC PROJECTS

ORAL CAVITY REGION DETECTION SYSTEM | GROUP

2022 March - Present

- Developed a web-based application for oral cavity image analysis, utilizing machine learning algorithms to accurately segment anatomical structures within uploaded images.
- Contribution- Developed and deployed certain features of the front end, such as navigation menus, forms, and interactive elements using *Node.js*, *MongoDB*, *Express.js* and *React.js*.
- Project code and documentation available at [\[documentation\]](#).

CYBER-PHYSICAL SYSTEMS PROJECT | GROUP

2022 October- 2023 January

- Programmed an embedded system that evaluates the severity of road rule breakings with regards to the crossing of road lines using *Python (OpenCV)*, *JavaScript* and *cloud firestore*.
- Contribution- Implemented a device utilizing store-bought sensors and a Raspberry Pi microcontroller and designed a mobile application that allows users to track and monitor rule violations based on location, severity, date and time.
- Project code and documentation available [here](#).

ANDROID APPLICATION FOR STUDENT RESULT MANAGEMENT

2021 November - 2022 March

- Developed an application for undergraduates to keep track of their academic performance, progress and standing against other students in the batch.
- Used technologies *MySQL*, *Andriod Studio*, *Spring Boot*, *Postman* and *JAVA*.
- GitHub code and documentation can be found [here](#).

DATABASE FOR EQUIPMENT MANAGEMENT | GROUP

2021 November - 2022 March

- Designed and implemented a fully functional database system to manage reservations, cancellations, equipment borrowings and misplacements at a gym using *MySQL* and *PHP*.

BUILDING AN 8-BIT SINGLE CYCLE COMPUTER PROCESSOR- RISC V

2021 November - 2022 March

- Built an 8- bit single cycle processor from scratch, with an Arithmetic Logic Unit (ALU), register file, control logic, data memory, data cache, instruction memory and instruction cache using technologies *ARM Assembly* and *Verilog HDL*.
- Implemented a memory hierarchy to optimize data access and processing speed.
- Link for code and documentation can be found [here](#).

DATA VISUALIZER FOR ANALYTICS

2021 August - 2021 September

- Created a data visualization solution that utilizes data gathered through virtual meeting tools to generate custom visualizations tailored to specific user needs.
- Used *C Programming Language* to develop the tool. The link to the code can be found [here](#).

A DIGITAL CLOCK

2021 September- 2021 October

- Created a program that prints the current time and date on a linux terminal in the format and font of a digital clock using *C Programming Language*.
- Link for code and documentation can be found here [\[implementation\]](#).

EXPERIENCE

INSTRUCTING

2022 September- 2023 January

Worked as a casual instructor to assist 2nd year computer engineering undergraduates at the University of Peradeniya in labs

- Helped with the subjects digital design and computer communication networks.
- Prepared and delivered laboratory classes 4 hours a week.

DEPARTMENT PROJECT- SMART INVENTORY MANAGEMENT WEB SYSTEM 2022

University of Peradeniya

- Database administration and website design using the Laravel framework.
- Developed a platform to assist the creating and managing of resources and reservations and to allow maintaining resources by sending scheduled reminders.
